

Lithium On Demand

Program Features:

- Lower Total Cost of Ownership (TCO).
- Optimize performance in your operation.
- Pay monthly based on actual usage of the batteries.
- Includes the following:
 - Batteries and chargers sized to your applications.
 - Total installation of batteries and chargers.
 - Training of personnel.
 - Full-service support of batteries and chargers by a local service provider.
 - Connectivity to Green Cubes cloud-based monitoring and tracking processes.
 - 24/7 Tech support
 - Spare batteries, up to 10% available as advance exchange.
 - No maintenance required by user.

Program Working Plan:

- Our Lithium SAFEflex system track and calculates partial charge/discharge cycles.
- You are only billed for full charge cycles monthly.
- On-site staff training to ensure proper use of the batteries and chargers.
- Review usage at 6-month milestones.
- 36 Month term.
- Financing on a month to month basis with a 90-day notice of termination.
- Minimum order of 20 batteries and chargers.
- Regular PM visits and annual service and repair reporting.

Benefits of Lithium:

- Create a cleaner, healthier and safe workspace for employees.
- No changing of batteries required.
- No ventilation systems required.
- Full Charge within 60-90 minutes with adequate charger
- No battery watering or maintenance required.
- Increase environmental sustainability and reusability due to longer cycle life.
- Drop-in replacement for Lead Acid batteries with existing equipment.
- Have a higher recharge efficiency for energy and cost savings.

Let us perform a survey of your applications and provide a proposal on our Lithium on Demand for your applications free of charge.

ABOUT GREEN CUBES TECHNOLOGY

Green Cubes Technology harnesses over 30 years of industry experience to ensure we design, develop and deliver solutions for the most challenging energy needs. We offer battery technology innovation, application design and performance management to drive productivity, scalability and sustainability.
